**Summary** : Free the child in post-apocalyptic cinema pdf download - the child in post-apocalyptic cinema interrogates notions of the child as a symbol of futurity and also loss by exploring the ways children function discursively within a dystopian framework we may better understand how and why traditional notions of childhood are repeatedly tethered to sites of adult conflict and disaster a connection that often functions to reaffirm the rightness of past systems of social order this collection features critical articles that explore the role of the child character in post-apocalyptic cinema including classic recent and international films approached from a variety of theoretical methodological and cultural perspectives
