**Summary :** Free reforming the state without changing the model of power pdf download - this book places administrative reform in post-socialist countries in a broad context of power and domination this new perspective clarifies the reasons why reforms went awry in russia and some other post-soviet countries whereas they produced positive outcomes in the baltic states and most east european countries the contributors analyse the idea that administrative reform cannot produce sustainable changes in the organization of the state apparatus as long as it does not touch the underpinning model of power and domination using an interdisciplinary and comparative approach the essays combine elements of philosophy sociology political science and economics including a wealth of primary and secondary data surveys in-depth interviews with state representatives and participant observation the book focuses on russia and analyses recent developments in this country by the way of comparison with the experience of carrying out administrative reform in ukraine bulgaria poland germany and north america this book was published as a special issue of the journal of communist studies and transition politics
